

## Sustainability/ Lifestyle for Environment (LIFE): A Report

[Date: 31.07.2023]

The NSS Wing of Dev Sangha Institute of Professional Studies and Educational Research organized an impressive Rally on the theme “Sustainability/ Lifestyle for environment (LIFE)” on 31st July 2023. The Rally was part of the year-long celebration of “Azadi Ka Amrit Mahotsav” planned by Govt. of India.

The purpose of the Rally was to increase awareness about the importance of adopting an environmentally sustainable lifestyle amongst people and spread awareness about reducing an individual's or society's use of the Earth's natural resources for personal use. It involves making conscious choices about how we live, work, and consume in order to minimize our impact on the environment. The Rally started from our college campus and covered the nearby areas before returning to the college.

During the Rally, participants carried banners and placards with messages on promoting sustainable living. They also chanted slogans to encourage citizens to adopt eco-friendly practices in their daily lives. The event was a great success, with many people showing interest in learning more about sustainable living. By making small changes in our daily habits, such as reducing our use of plastic, conserving water and energy, and choosing public transportation over private vehicles, we can make a big difference in protecting the environment.

Principal, faculty members and students of DIPSER participated enthusiastically in the programme. The Rally was an important initiative in increasing awareness about the need to adopt eco-friendly practices in our society. By working together and making conscious choices, we can create a more sustainable future for ourselves and also generations to come. In that context, the Rally was a grand success.
